

The Gamma function and its inverse

12.11**David Jeffrey***(University of Western Ontario, London, Ontario, Canada)***Time:** Friday 26.07., 11:00 - 11:30, Room HS 4

Abstract: Some new results on expansions of the Gamma function will be presented. The functional inverse of the Gamma function has been little studied, although there are applications. The definition of the inverse will be discussed and its computation described.
